Transporting vehicles must prevent its contents from dropping, sifting, leaking, or otherwise escaping while traveling on public roads. All non-composted animal carcasses are prohibited from transport. The transport of animal manure to and from identical animal type operations must notify the DNMP and may be required to take extra biosecurity measures as determined by the DNMP. All stockpiling, storage, and handling of nutrients associated with relocation must adhere to state standards set by public law within states of transport.

The transporting agency will be required to maintain records with the following documents for a minimum of three years from the date of payment:

- 1. A daily summary of all nutrients transported indicating the tonnage moved and the total mileage from origin to destination.*
- 2. A summary of all vehicles involved in transporting nutrients indicating load class, licensed Gross Vehicle Weight (GVW), vehicle type, year, and identification number, if available.*
- 3. Approved application(s) for transportation from the DNMP.*
- 4. Record of load weights for each shipment of manure transported.*

The undersigned agree to indemnify and hold harmless the Delaware Department of Agriculture and the Delaware Nutrient Management Commission from any liability resulting from the removal, transportation, and use of nutrients as described in this application. Failure to comply with the terms of the Delaware Nutrient Management Program Nutrient Relocation Policy or any other State funding program may result in exclusion from payment of claims and liability for returning the full amount of claims paid.

*****Claim for Payment must be submitted within 40 days from date of transport.*****
